

The Classic Passive EQ, AnaMod-Style

- Analog model of the classic EQP
- Six recallable presets
- All analog - no latency
- Single-space 500 series rack format

The AnaMod AMEQP is the API 500 series incarnation of the classic EPQ1A equalizer, created using the AnaMod Process™. Every detail is included in this small package, including never before available recallable presets.

The AMEQP is completely analog (no latency) and provides the smooth, musical sound of its vacuum tube predecessor.
